                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                         Search time 2173.58 Seconds
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence Sequence Sequence 3

Sequence 10, Application US/09135639

Patent No. 6004793

GENERAL INFORMATION:
APPLICANT: LONNEN: LONNEN:
APPLICANT: DALFON MICHAEL A.,
APPLICANT: MILSON, GEOFFREY G.
APPLICANT: XU, SHUANG-YONG
TITLE OF INVENTION: Method For Cloning And Producing The Aval Restriction
TITLE OF INVENTION: Endonuclease In E. coli And Purification Of The
TITLE OF INVENTION: Recombinant Aval Restriction Endonuclease
FILE REFERENCE: Aval
                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Length 31;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 11, Application US/08732612
Patent No. 522283
GENERAL INFORMATION:
APPLICANT: MORSEY, MOHAMAD A.
TITLE OF INVENTION: METHODS FOR PRODUCTION OF RECOMBINANT
TITLE OF INVENTION: PLASMIDS
NUMBER OF SEQUENCES: 1
CORRESPONDENCE ADDRESS:
ADDRESSEE: MORRISON & FOERSTER
STREET: 2000 PENNSYLVANIA AVE., NW
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Indels
                                                          COMPUTER RELDABLE FORM:
